

Supplementary Fig. S2. Distribution map of the genus *Reinboldiella* in the northwestern Pacific region. Red indicates *Reinboldiella koreana* sp. nov., which is distributed along the southern and eastern coasts of Korea. Dark blue indicates *Reinboldiella schmitziana* (previous name for Korean *Reinboldiella* specimens) collected in Japan, the type locality of this species. Pink and light blue indicate *Reinboldiella taiwanensis* and *Reinboldiella warburgii*, respectively, which are restricted to northern Taiwan. Green indicates *Reinboldiella orientalis*, which is distributed along the southern and northern coasts of Taiwan. *Reinboldiella robusta* and *Reinboldiella filamentosa* have not been studied since their first descriptions (Itono 1977).
